## Writing 4

A natural Wonder

Where is it?

What does it look like?

What can you do there?

When's a good time to go there?

### Laguna de Quilotoa

The best place and natural wonder of our country is the Quilotoa Lagoon.

It is located on the volcanic front west of the city of Latacunga. It is a beautiful place with turquoise waters and surrounded by lots of vegetation. Camping is allowed at the bottom of the crater. You can take a walk. Discover a craft workshop and you can take boat trips in the crater of a volcano with crystal-clear waters. The most interesting time to visit is in summer because the lake looks wonderful in the sun.
